What's New In RoomOS

Remote Access

Remote Access allows the admin to interact with the device UI from Control Hub as if the admin is in the room from the point of registering the device to Control Hub. Remote Access will work on both RoomOS and MTR devices. Use cases can be, but aren't limited to, the following:

- Getting the code from the last step in an MTR deployment
- Drawing up meeting zones and configuring the mic
- Testing UI Extensions and Macros

AI Assistant in Webex on devices

Use the AI Assistant in Webex meetings on your device to quickly "Catch me up" or ask, "What are the action items?"

Once the AI Assistant meeting summary is on, anyone in the meeting can send prompts.

Post meeting, a full AI generated meeting summary with action items will be available in Webex or via email.

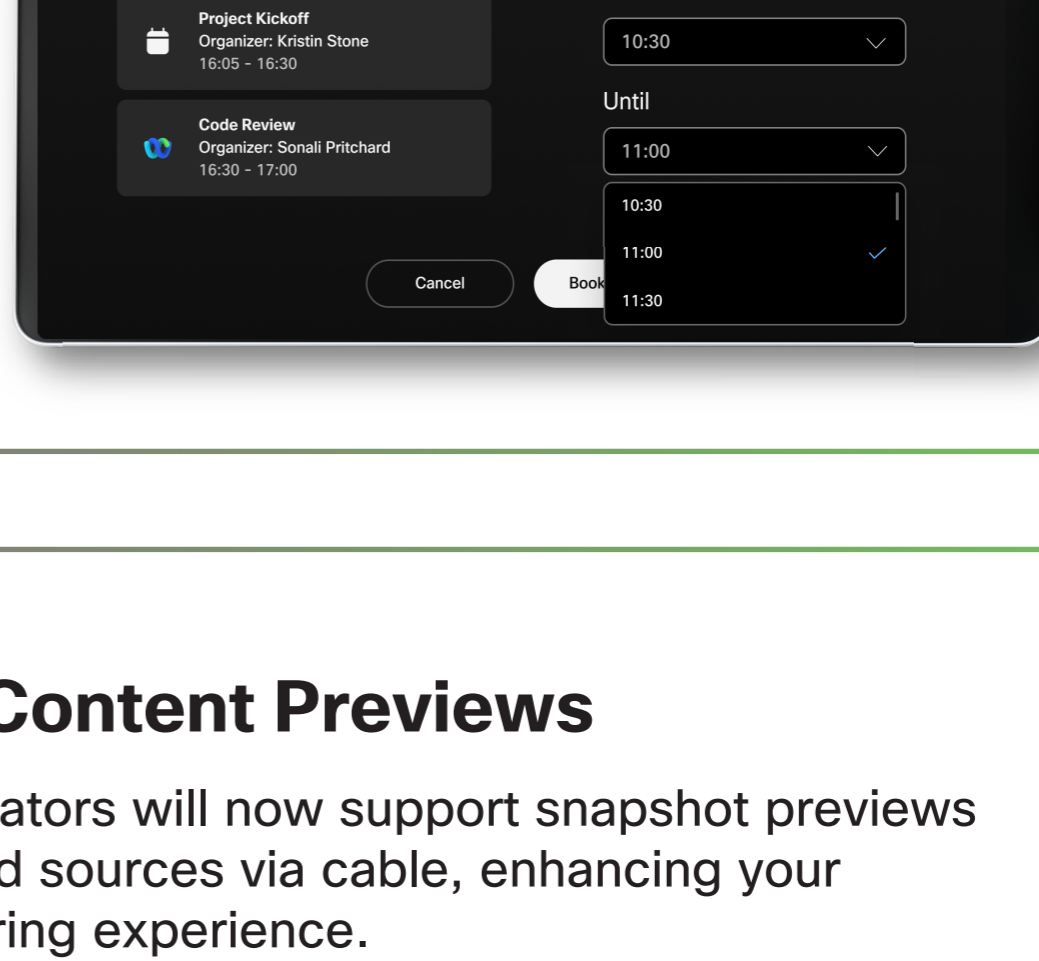

[Know More](#)

Book ahead & other calendaring enhancements

Enables ad hoc bookings to start at any available time throughout the current day, not just the present moment. This works both inside and outside the room.

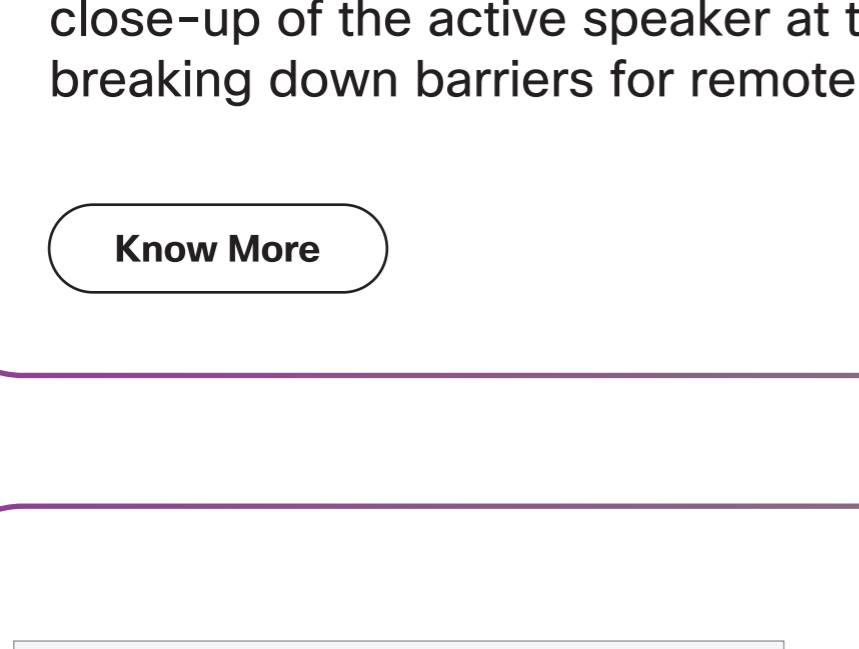

[Know More](#)

Cabled Content Previews

Room Navigators will now support snapshot previews of connected sources via cable, enhancing your content sharing experience.

[Know More](#)

Group and Speaker

Provide the full room context with a group view and close-up of the active speaker at the same time, breaking down barriers for remote participants.

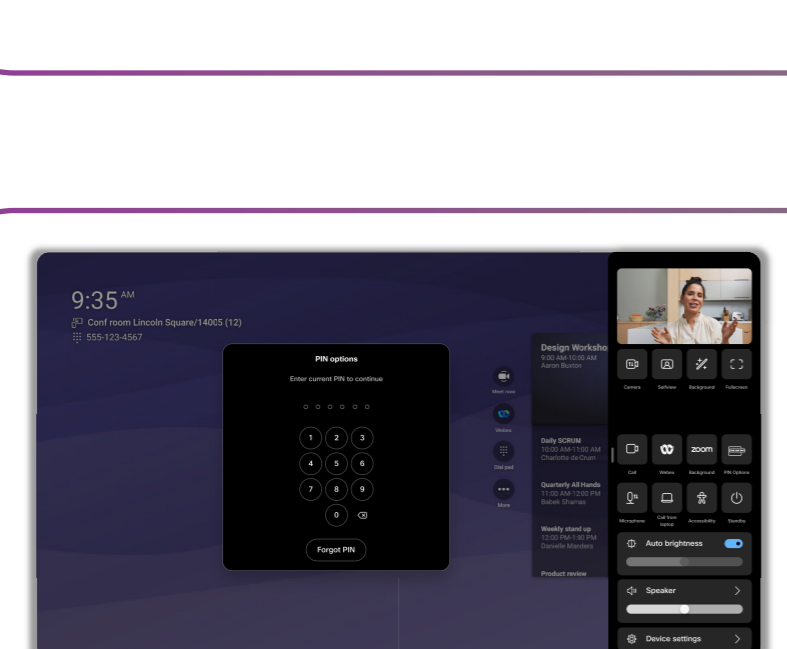

[Know More](#)

Text & Emojis in Whiteboarding

You can now add text and emojis from your RoomOS device.

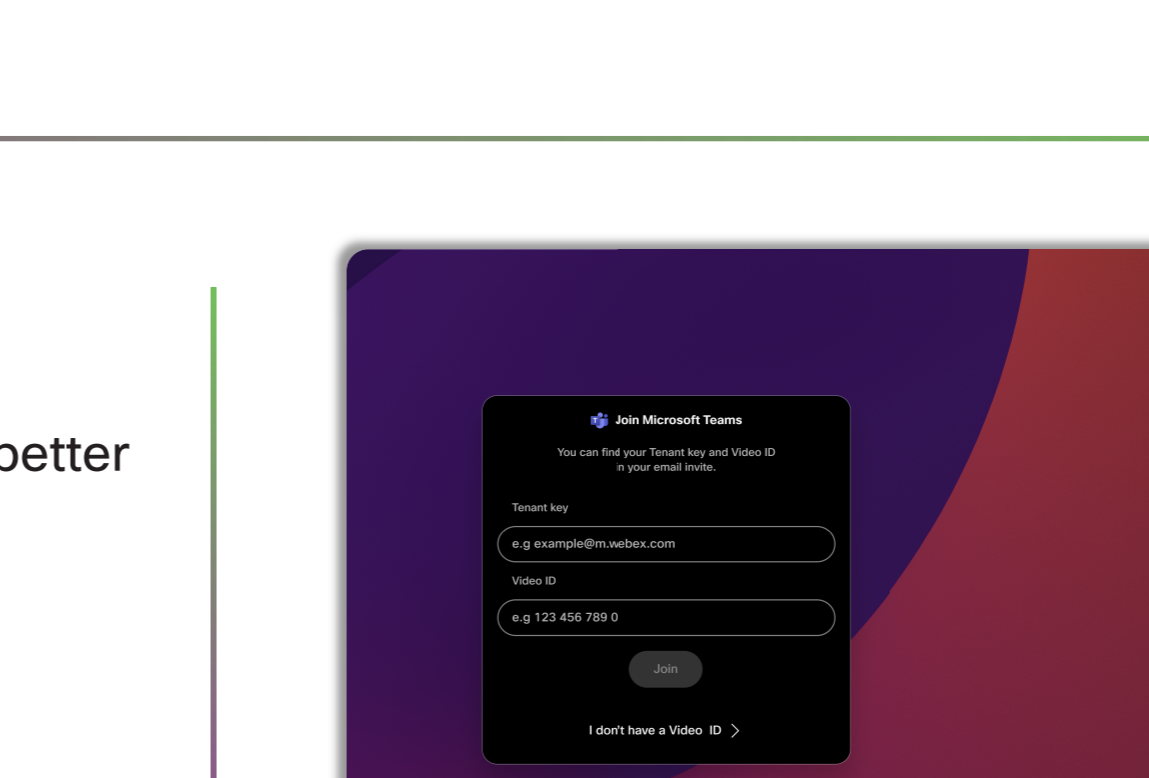

[Know More](#)

Companion Mode

Layout Improvements

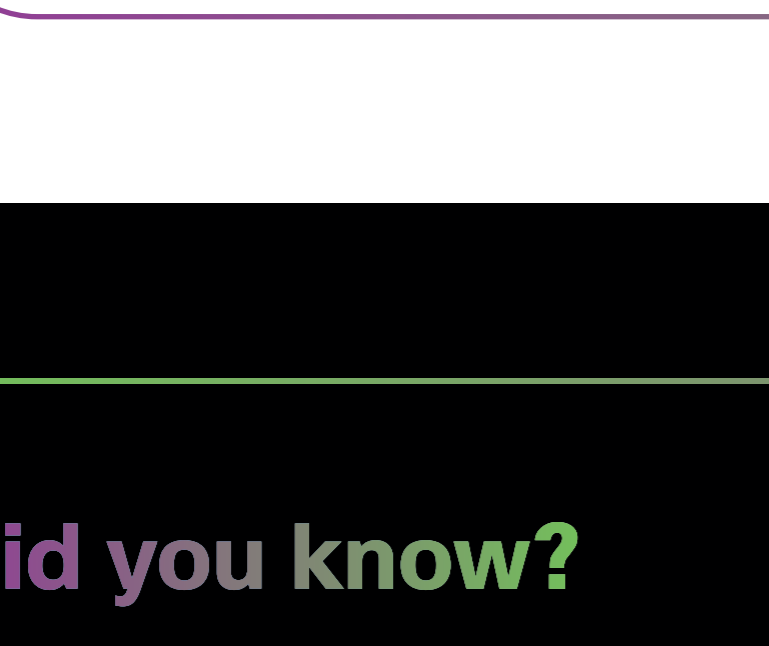

[Know More](#)

Screen Lock for MTR

This enhancement supports PIN lock in MTR mode when the device is used a personal device.

[Know More](#)

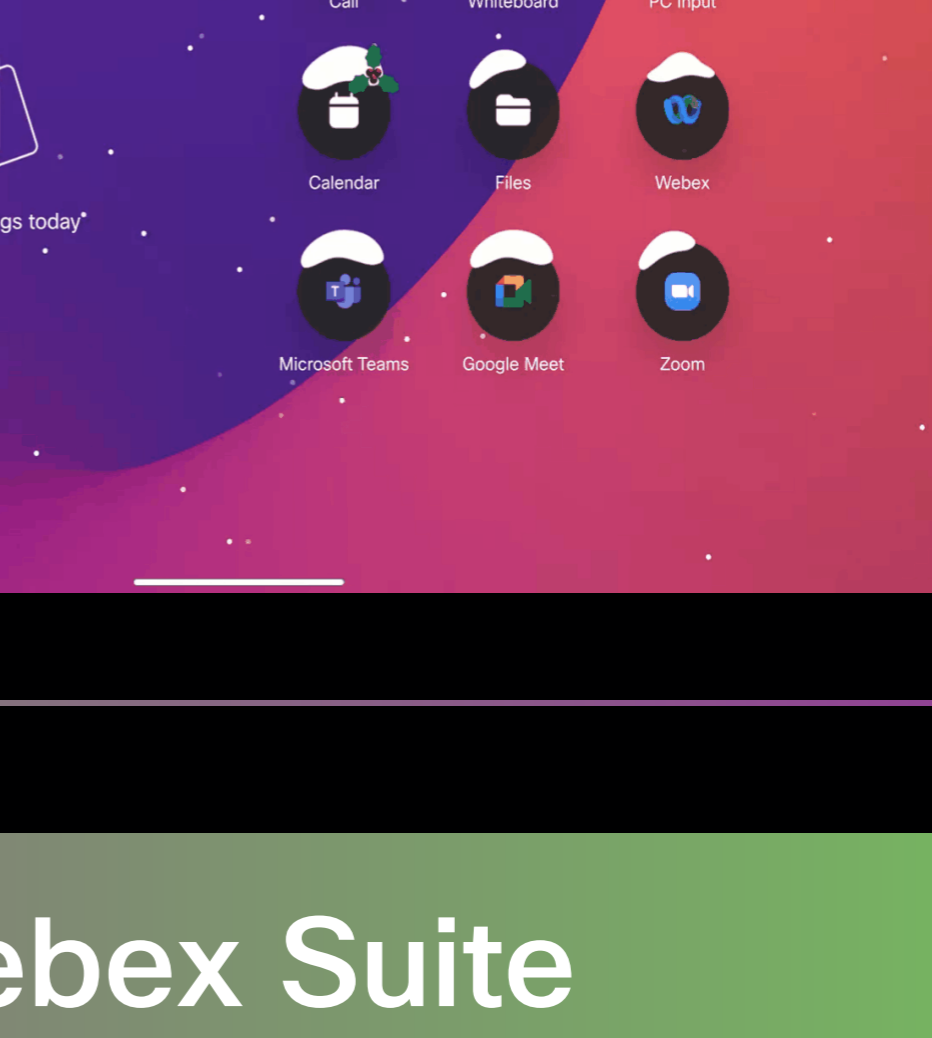

Microsoft Teams Join Button

Teams button will be updated to try to give a better dialing experience by reducing complexity.

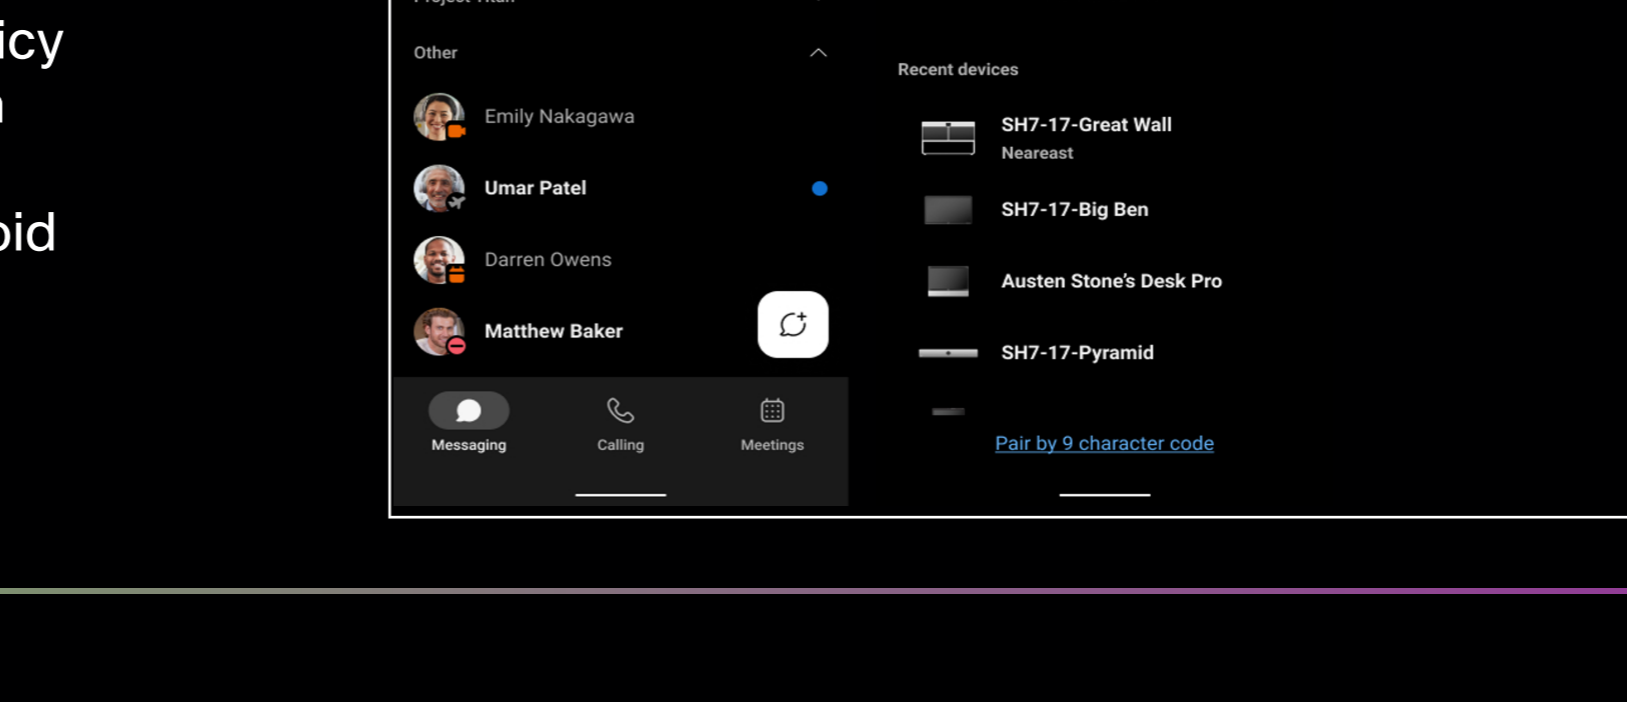

Default will be VIMT as the preferred joining method, and WebRTC as secondary method.

What's New in Webex Control Hub

Customize the columns on the user page

Customers want the ability to manage and customize the columns displayed in the User List View in Control Hub

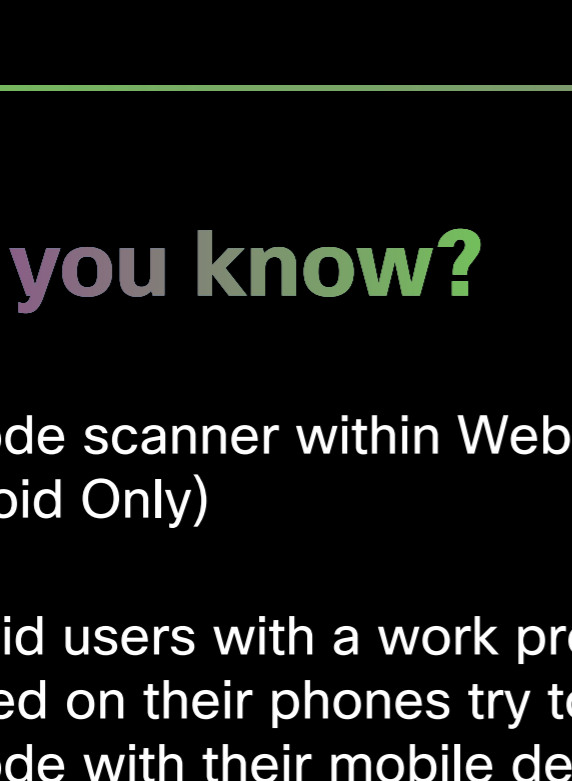

[Know More](#)

Add a company homepage to Vidcast

Your organization can have a dedicated company homepage that will replace Home as a default homepage for all Vidcast users in your organization.

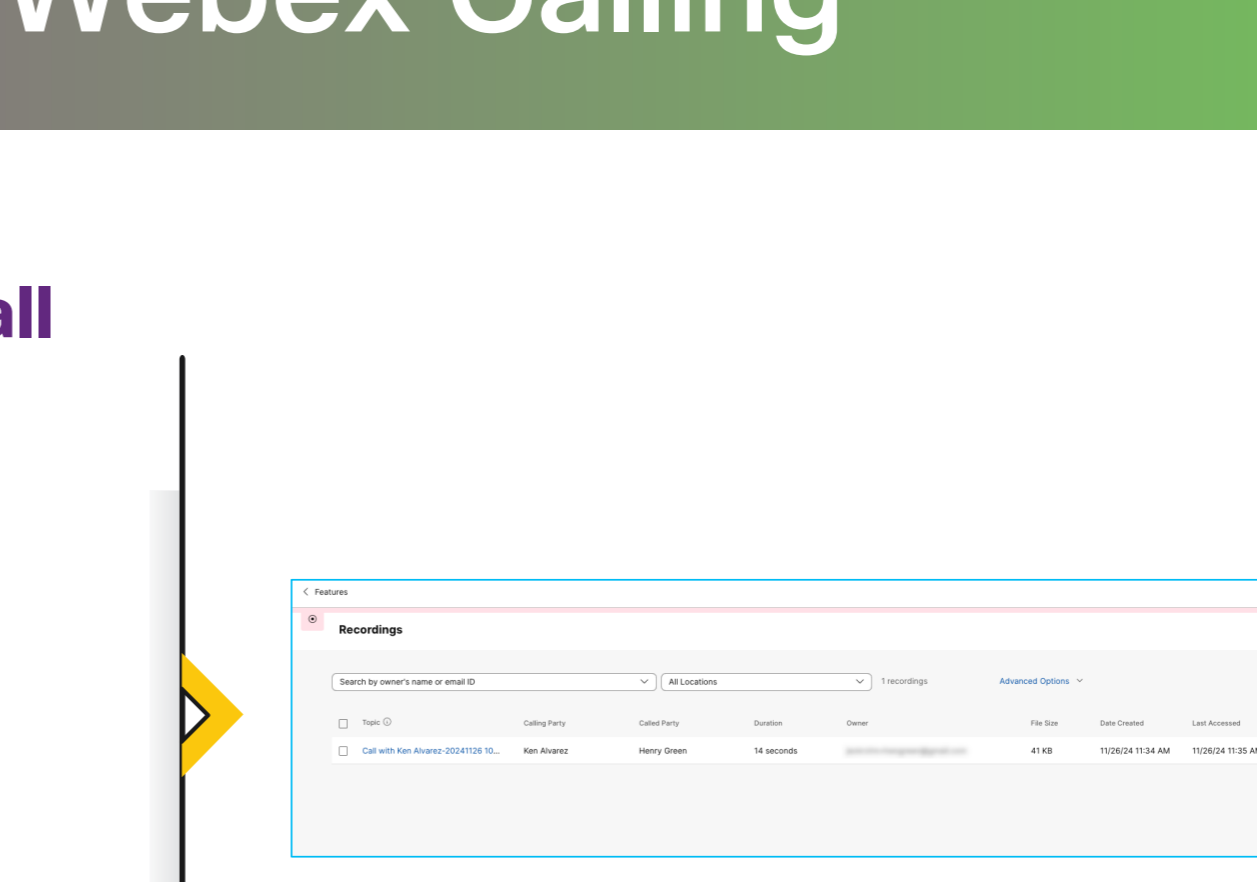

[Know More](#)

Did you know?

QR code scanner within Webex App (Android Only)

Android users with a work profile policy enabled on their phones try to scan a QR code with their mobile devices, it does not work, and the Webex Android app does not open for quick pairing.

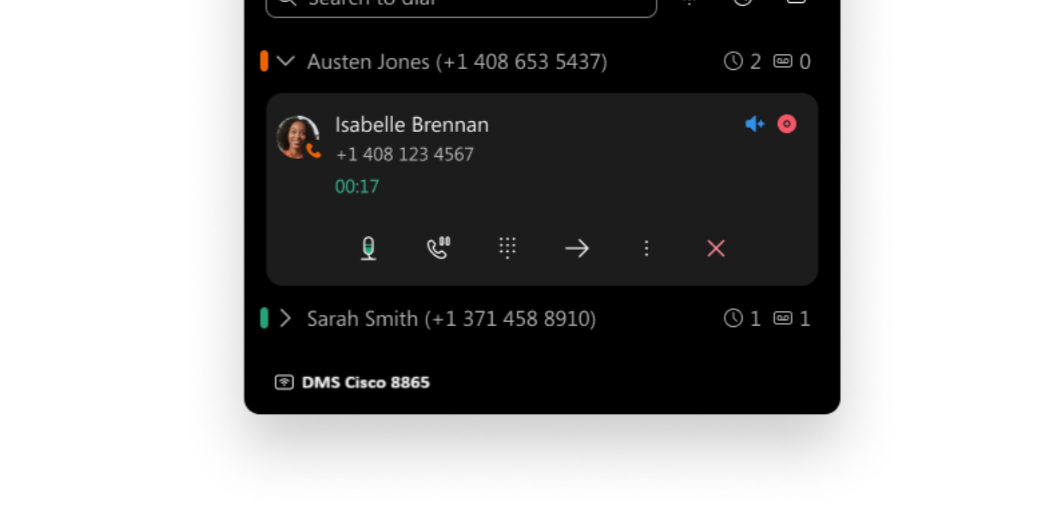

What's New in Webex Calling

Playback and Download of Native Call Recording via Control Hub

If you're a Control Hub administrator and a compliance officer, you can now play and download recordings directly from Control Hub. However, if you're an administrator but not a compliance officer, you can't listen or download these recordings. If the administrator permits, end users can still manage their own recordings within the Webex App or User Hub.

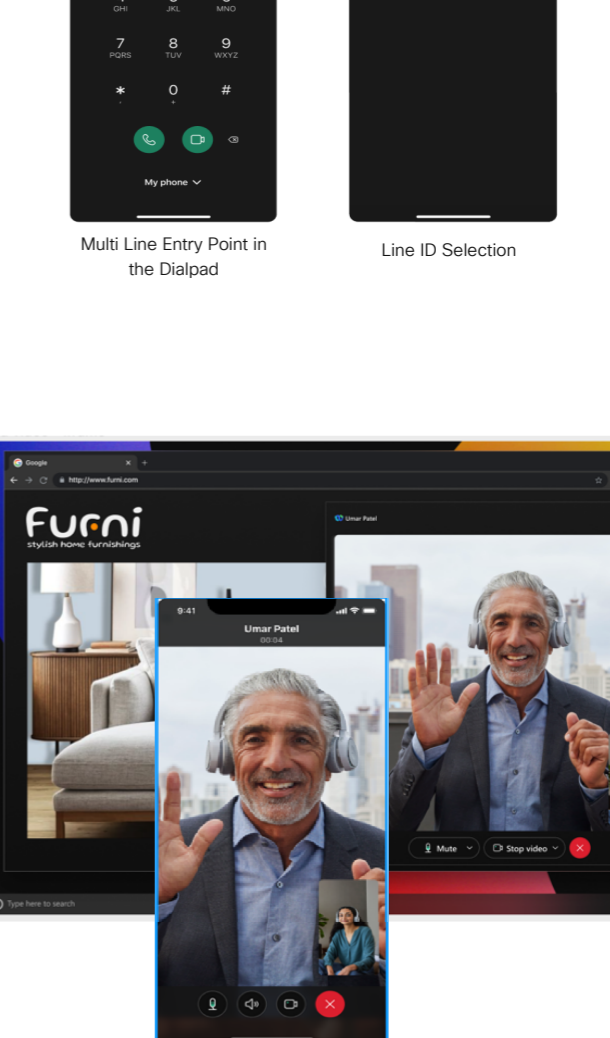

[Know More](#)

Calling Dock : Deskphone Control Mode

This feature will allow users to pair/unpair with their provisioned deskphone and then make or pick-up deskphone calls.

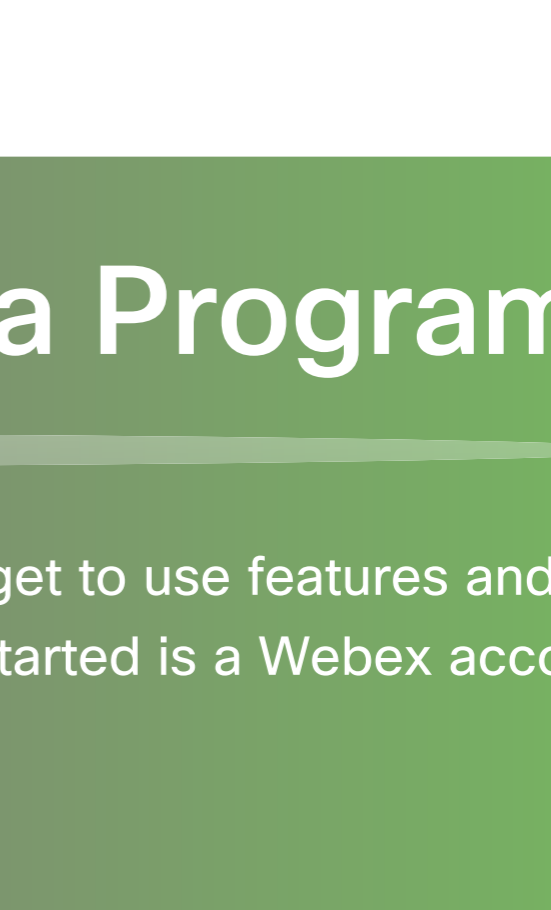

[Know More](#)

Multi Line on Mobile

This feature enables support for multiple lines on Webex App for mobile

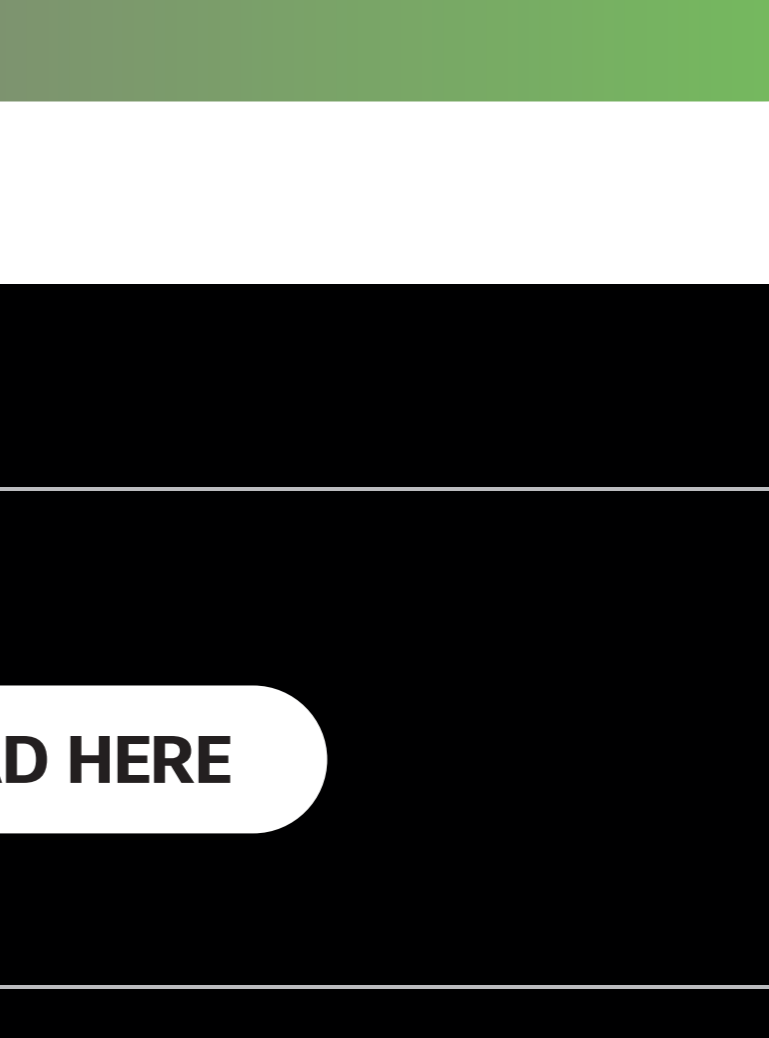

[Know More](#)

Guest Calling Support with Webex Calling

Streamlines customer communication by simplifying the process of customers reaching out to your Sales, Support, and other Business-to-Consumer (B2C) communication needs directly through click-to-call from organization's web browser
