

Future-proofed Workplace with Wi-Fi 7

Office is a magnet, not a mandate

Imagine a workplace where innovation meets sustainability, where cutting-edge technology transforms the way we work, where every workspace can be easily managed, analyzed and with end-to-end visibility. This vision is already a reality at Cisco, and we are thrilled to extend an exclusive invitation to you.

As massive advances in speed, bandwidth, and latency transform connectivity on a global scale, businesses can harness next-generation wireless technology to build workplaces that anticipate the challenges of an AI-powered future.

Come learn, not only about Wi-Fi 7 offerings from Cisco, the latest and greatest in wireless technology but also the advances in campus switching that are required to support Wi-Fi 7. Get a view of Secure segmentation practices that will secure your workplace and leverage automation, assurance and observability to support all times of users and devices.

We would like to invite you to attend in-person “Future-proofed Workplace with Wi-Fi 7” event to gain in-depth info on all the exciting offering

Agenda

-  **Cisco’s Wi-Fi 7 Launch**
-  **Are you ready for Wi-Fi 7 ?**
-  **Secure Campus Infrastructure for Wi-Fi 7**
-  **End to End Digital Experience Assurance and AIOps**

We look forward to seeing you in person
