What's New in Webex Suite Meetings Platform?

Faster meeting join experience – combine sign-in/join as guest and display name steps

Previously, guest users would take 3 steps to join (click 'Join as a guest, enter name/email, click join meeting on interstitial page).

Now, guest users take 2 steps to join (enter name/email, click join meeting on IS). Users still have the option to sign in the link at the bottom of the page

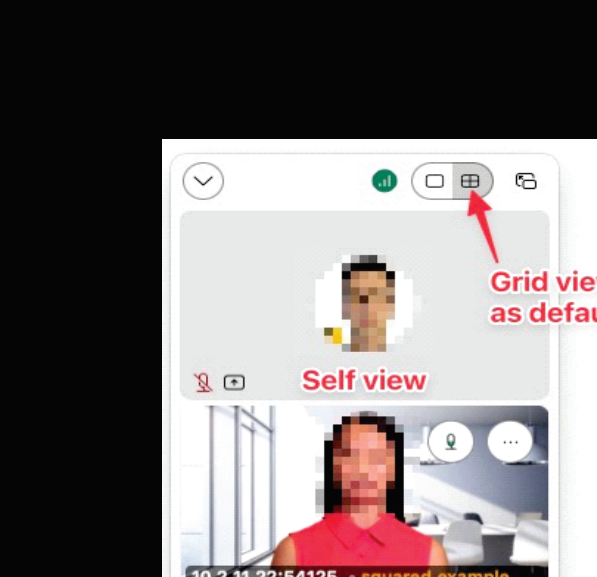

[Know More](#)

Choose the correct audio device for meetings

To make it easier for you to select the right audio option for your meeting, we added the device type Built-in, HDMI, USB, or Virtual-in parentheses next to the device name.

[Know More](#)

Add SIP participants to a meeting via REST API

Offers easy experience both via the app and via their public RESTFUL APIs and SDKs to be able to bring SIP video device users into meetings.

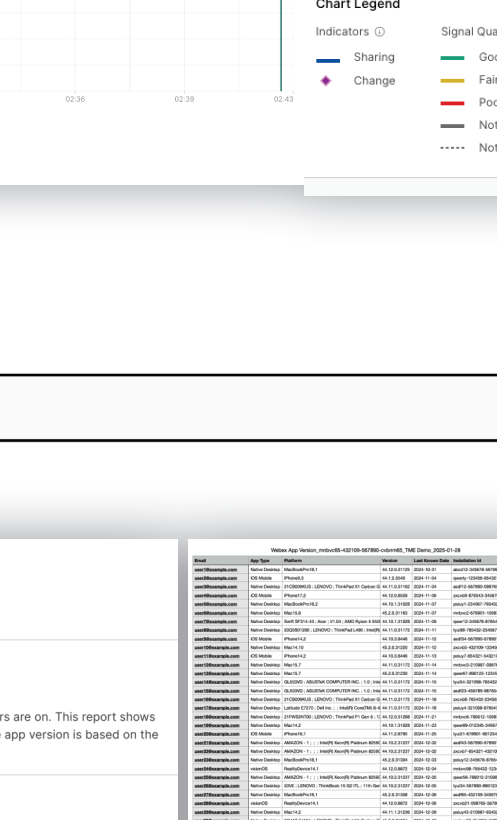

[Know More](#)

Grid view default for presenter in floating video window, along with self-view

Previously, when the presenter is sharing screen, they can only see one participant video, can't see self-view by default.

This feature changes the floating video window to by default use the "Grid" layout.
